

High-Quality Clinical Trials

Our goal at the Alpha Clinics is to deliver high-quality stem cell clinical trials to patients.

"As a patient, the best part of this study was getting to know and working with people who are in it for all the right reasons. Everyone at the Alpha Clinics shares a great sense of adventure and service to the community of patients and their families." — John Welsh, Diabetes Patient

MISSION

To accelerate the development and delivery of stem cell treatments to patients.

We have specialized, patient focused teams dedicated to:

- Helping you gain information about specific clinical trials
- Navigating you through the "ins and outs" of trial enrollment, informed consent, study procedures and follow-up visits
- Providing support, educational resources and follow-up throughout the study

Stem cell trials conducted at Alpha Clinics have been reviewed and authorized by the FDA and are approved and monitored by the clinic's research ethics committee.

Alpha Clinics are Located at Top Medical Centers

The Alpha Clinics at UC San Diego, City of Hope, UC Los Angeles, and UC Irvine currently support trials in:

The CIRM Alpha Clinics team is dedicated to delivering the highest-quality stem cell clinical trials programs available for patients.

- Severe Combined Immunodeficiency (SCID)
- Leukemia and other Cancers
- Blinding eye diseases
- Spinal cord injury
- Heart disease
- HIV
- Sickle Cell Disease
- Diabetes
- Stroke

*The Alpha Clinics plan to expand to a variety of other diseases
